Client Reports - the options available

| Report Name                                    | Report Description  |
|--|---|
| Client Valuation                               | A comprehensive statement of a client's holdings - including the valuation and overall change at a given date across all products held.   |
| Client Statement                               | A periodic statement of a client's holdings with Novia Global over a specified period of time. This includes an account valuation, Intermediary payments, and transaction history of all Products held over the selected date range.                                    |
| Portfolio Performance Review                   | A report designed to calculate the achieved rate of return on a client<br>portfolio between any two specified dates. The rate of return is money<br>weighted and provides a true measure of the return a client has obtained<br>on their investment after all expenses. |
| Transaction History per Client                 | A comprehensive breakdown of all transactions that have occurred on a selected client's account over a defined period.  |
| Transaction History per Branch<br>(Firm Admin) | A comprehensive breakdown of all transactions that have occurred across an entire branch over a defined period.   |

### 1) From the homepage select "Reports" and then "Reports About Clients"

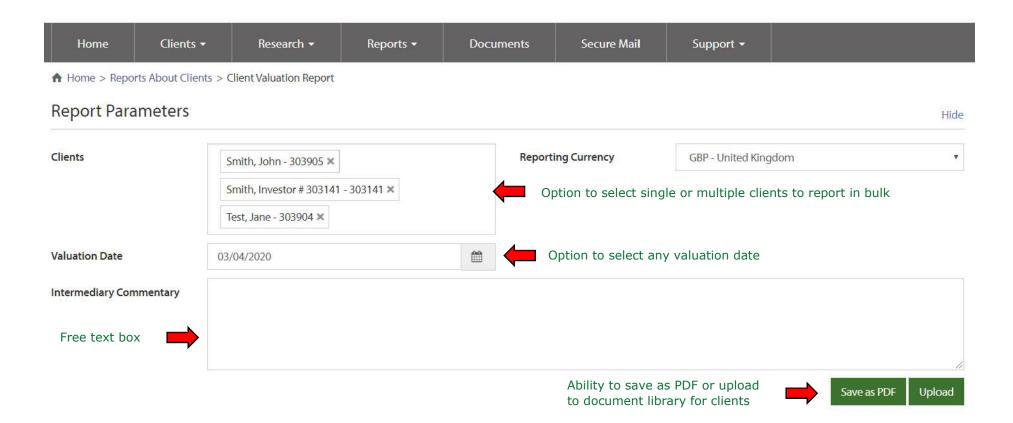

|   | Home | Clients + | Research 🕶 | Reports +     | Documents | Secure Mail | Support + |  |
|---|------|-----------|------------|---------------|-----------|-------------|-----------|--|
| A | Home |           |            | Reports About | Clients   |             |           |  |

### 2) Then select the appropriate report

| Report Name                    | Report Description   |      |
|--------------------------------|--|------|
| Client Valuation               | A comprehensive statement of a client's holdings - including the valuation and overall change at a given date across all products held.  | View |
| Client Statement               | A periodic statement of a client's holdings with Novia Global over a specified period of time. This includes an account valuation, Intermediary payments, and transaction history of all Products held over the selected date range                            | View |
| Portfolio Performance Review   | A report designed to calculate the achieved rate of return on a client portfolio between any two specified dates. The rate of return is money weighted and provides a true measure of the return a client has obtained on their investment after all expenses. | View |
| Transaction History per Client | A comprehensive breakdown of all transactions that have occurred on a selected client's account over a defined period  | View |

### Client Valuation Report:

### Client Statement Report:

This report is similar to the valuation report but allows start and end date reporting (eg if a calendar year report is required).
