iFast™ Web

Enhancing the Advisor experience

Better access to your data

Access your iFast data where, when and how you want it in a clean, streamlined environment that is intuitive and easy to navigate.

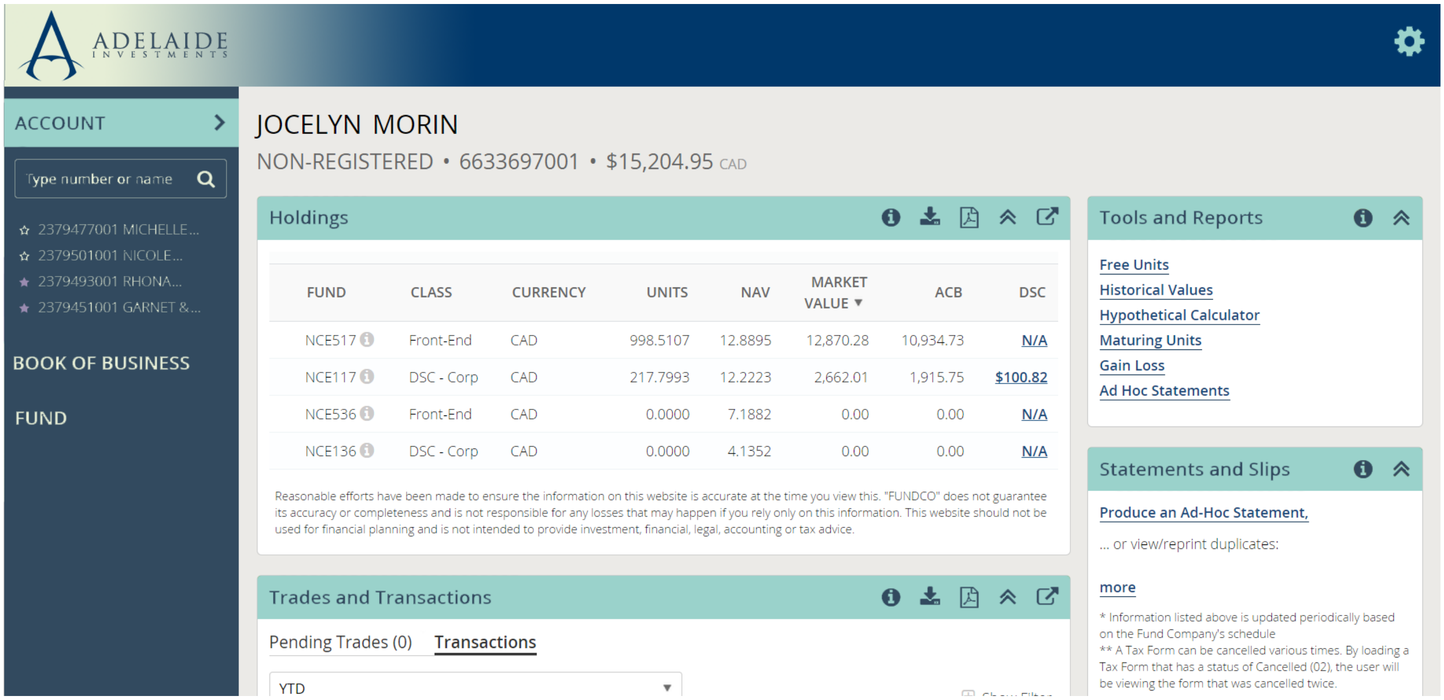
Allow Advisors to view their entire book of business in one location, where information and full reporting capabilities are available with just a few clicks.

Instantly view, download and share key reports, statements and tax slips using advanced smart search technology and dynamic filtering techniques.

Reduce time spent on administration and make it easier for your clients to do business with you through the provision of numerous self-service tools that are flexible and customizable to suit your users needs.

Benefit from new features, modifications or enhancements made by other users thanks to our shared platform.

Smart and simple



What is it?

iFast Web is a browser-based application that provides Advisors with instant access to key fund and account information in a secure online environment. The responsive, adaptive design layer ensures optimal performance across multiple devices and browsers, resulting in a smooth, organized and efficient experience.

Dynamic views

The dashboard style home page is organized primarily in two dynamic views – Account and Advisor. From the Advisor view, Advisors can assess their entire book of business and review accounts and assets, trades and transactions, as well as compensation information, such as trailer fees and commissions.

How it works

Using core data from our iFast record-keeping system, the intuitive website puts user-friendly features at your fingertips, allowing you to save time on administrative tasks and focus on supporting your clients and growing your business.

White labelling

Configure and customize the site to ensure your brand is properly reflected. Modify the look and feel according to your own needs, from adding your corporate colour palette to personalizing the terminology and labelling that is unique to your business. Select the views and columns you wish to see for the modules you need.

Smart search & dynamic filtering

Advanced smart search functionality remembers your search history and predicts what you are looking for to help increase efficiency. Smart search also allows you to configure your search across multiple identifiers, while the dynamic filtering capability ensures Advisors instantly find and easily narrow data to their individual requirements. The enhanced reporting features provide key reports, statments, and tax slips in minutes.

Your information. Your way

Account view

From the Account view, you can use tools such as the hypothetical redemption calculator, DSC free unit reporting and capital gain and loss reporting to help reduce the time it takes to get the information you want.

Be better prepared to serve clients with key reports, statements and slips that are fully customizable and readily accessible through the Account dashboard.

The smart search functionality and advanced filters make it easy to obtain the information you need when you need it. A full suite of self-service reports including Free Units, Historical Values, Capital Gains and Losses and Maturity Schedules can be organized by fund, date or transaction type. You can even create and configure Ad Hoc Statements organized by holdings and transactions to show data sets that are specific to you. With this level of flexibility, you can quickly navigate, view and download your reports for further analysis and instant sharing.

Key features

Modernized user interface	Enhanced navigation experience	Comprehensive mobile support for tablets	View book of business in one convenient location
Instant self-service reporting	Export, save and print your data	Smart search functionality	Narrow data and results with advanced filters
Available in both English and French	White labelled for personalized branding	Improved compensation information	Shared platform offers shared benefits

Determine next steps and plan with confidence using the Hypothetical Redemption Calculator. Run redemption scenarios on account levels to calculate elements such as DSC fees, Taxes, and Net Amounts. Ensure you are armed with the right information to help you plan and make smart, informed decisions with iFast Web's reporting tools.

DSC Free Units

Historical Values

Maturing Units

Ad Hoc Statements

Capital Gain Loss

Hypothetical Redemption Calculator

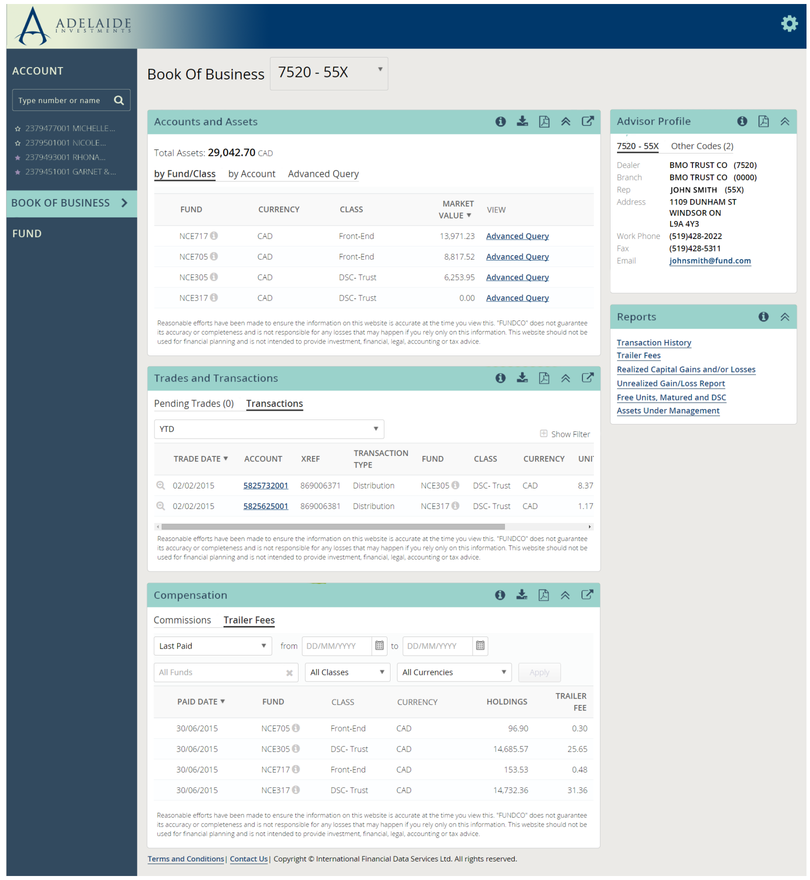
Get the full picture

Advisor view

Advisors can view their entire book of business in one convenient "My Book of Business" location that displays account details from multiple rep codes. From here, customized reports can be generated for either a full book of business or individual representative codes, and can simply be downloaded to PDF or excel format for further analysis.

Advanced reporting capability means advisors can easily run reporting for Assets under Management, Capital Gains and Losses as well as DSC fee and free unit amounts filtered by date range. With trades and transactions, Advisors are also able to amalgamate their accounts and drill down for further details on transactions that are pending and posted to obtain a full picture of transaction history by account in real time.

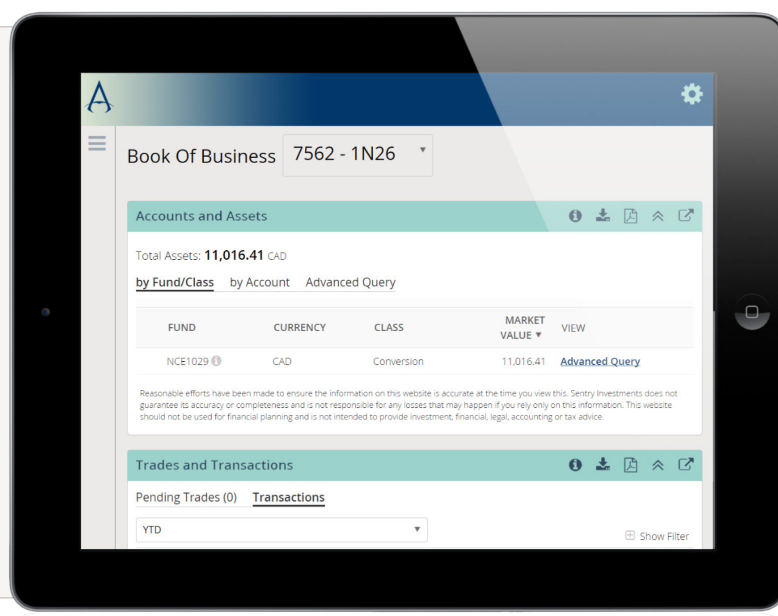
On demand compensation information ensures Advisors are fully informed of the status of commissions and trailer fees by fund for any given date range.



On the Go?

Mobile devices are transforming the way we work in the financial services industry. Advisors are on the go and increasingly rely on mobile devices to stay connected and gain access to the information they need.

iFast Web provides full mobile support for a range of tablets including iPad, Blackberry PlayBook and Samsung Galaxy (7" or higher), with full support for Chrome, Internet Explorer (IE8 or higher), Safari and Firefox. The responsive, adaptive design layer ensures optimal touch screen performance.



More reasons to choose IFDS

Global perspective and local knowledge

IFDS technology and service solutions are used globally, with operation centres across North America, Europe and Asia. As a subsidiary of State Street Corporation and DST Systems Inc, we are backed by a multi-billion dollar global enterprise with more than 40 years of experience in financial data processing. Yet, our core technology was developed right here in Canada, and we are on the leading edge of local compliance and regulatory issues.

Continuous research and development

We are the inventors and owners of our core technology - it is not licensed from a third party. Hundreds of IFDS employees work with our technology on a daily basis, continually identifying ways to make it even more powerful and reliable. What's more, when industry leaders ask us to develop new features and capabilities, our shared platform allows all of our clients to realize the benefits.

Client-centered service

Partnership is the basis of our client service model. Our clients succeed because we listen closely to them, create solutions that fit their needs, continuously invest in strengthening our people and technology, and see every project through to the achievement of our clients' ultimate goals.

About Us

IFDS Canada creates the technology and service solutions the financial industry is built on.

For over 30 years, tier one investment firms, insurance companies and deposit takers have relied on our proven record-keeping solution, comprehensive back office services, innovative workflow and insightful reporting tools to support growth, reduce risk, leverage technology and enhance efficiency.

IFDS wins top awards

Technology Innovation of the Year, Custody Risk Americas Awards, 2014

Technology Innovation of the Year, Stevie Awards for American Business, 2014

Corporate Social Responsibility, Customer Service & Marketing, Stevie Awards for American Business, 2013
